

Urban Drinking Fountain

Urban Drinking Fountain, a stainless steel wall-mounted filtered drinking fountain perfect for both indoor and outdoor use. It offers a sleek and modern design along with reliable filtration for fresh, clean water at all times.

Environmental
credentials

Quality & durability

- Wall mounted
- Single bubbler tap
- Optional extra bottle filler tap
- 350mm deep x 300mm wide x 300mm high

Important notes:

- Bubbler mechanisms not recommended for under -4 degrees temperature (unless mitigating site practices are put in place at site).
- Must be operated using mains pressure to ensure optimal performance.
- If a filter is used, it must be replaced every 6-12 months.
- Failure to replace filters may lead to blockages, reducing the bubbler's pressure.
- Clean filters are crucial for maintaining health and safety standards.

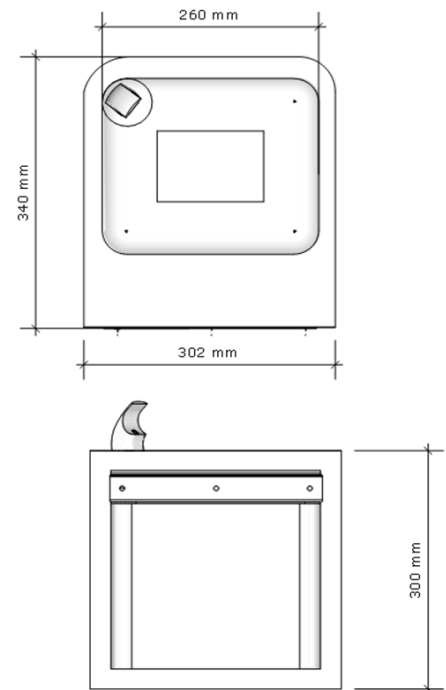

Ideal for

- Parks
- Schools
- Shopping centres

Finishes available

- Stainless steel
