

Minus Simple Drinking Fountain

The Minus Simple Drinking Fountain combines durability and style with its powdercoated Aluminium body and stainless steel bowls. It features a timed push-button mechanism for controlled water dispensing. The fountain is designed with accessibility in mind and is surface-mounted for easy and stable installation.

Environmental credentials

Wheelchair access

Quality & durability

- Powdercoated Aluminium body with stainless steel bowls
- Timed push button type
- Accessible
- Surface mounted

Important notes:

- The bubbler mechanism is inadvisable for temperatures consistently below 4°C, unless appropriate mitigation practices are implemented on-site.
- Fountain requires mains pressure to ensure optimal performance.
- Water pressure supply should range between 100-400kpa.
- If using a filter, it's recommended to be replaced every 6-12 months to prevent blockages that may result in insufficient pressure for the bubbler to function properly.
- It's crucial to maintain clean filters for the health and safety of users.

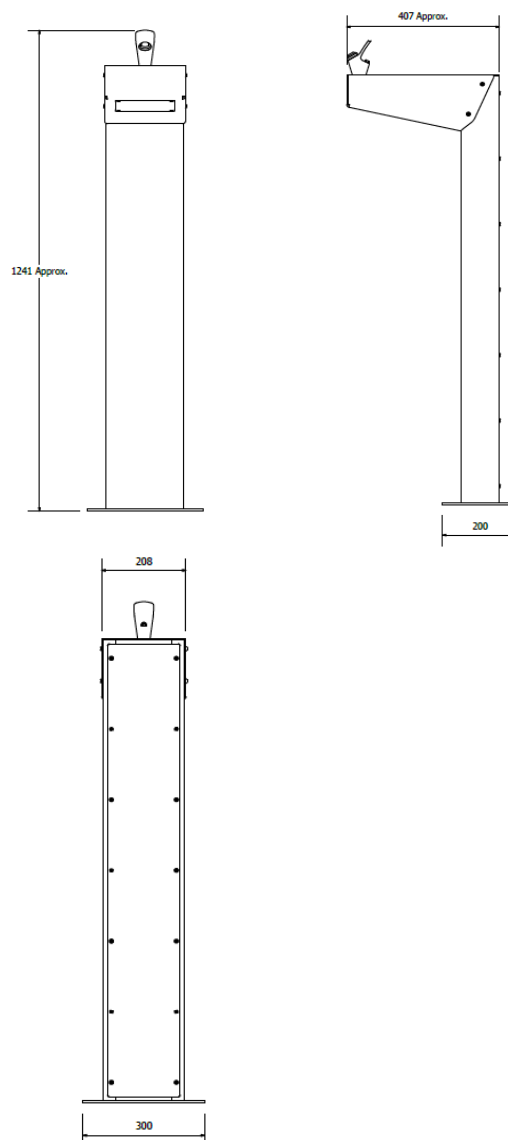

Ideal for

- Schools
- Council Parks
- Walkways
- Public Spaces

Finishes available

- Full stainless steel construction
